**INSTALLATION
INSTRUCTIONS**

INSTRUCTIONS FOR COMBINATION KRITTER-CAP® PRO

The combination KritterCap® PRO is a universal corner insert and can be used on most 2 3/4", 3", 3 1/2", and 4" corner posts for vinyl sided homes to prevent entry of most small rodents and stinging insects. It is easily sized by snipping off sections with the included side cutter snips.

NOTICE:
It is always recommended before installing KritterCap® PRO Corner Inserts that mice/rodents be trapped and removed first. Insect nests should be free of insects. Shine flashlight into mirror and look up corner post to be sure there are **NO STINGING INSECTS** before beginning installation.

The KritterCap® PRO Combination Insert is ready to use for 4" corner post. The base filler tabs are used for filling voids where the plywood subsiding or insulation board doesn't come to a perfect square corner and should be removed if not needed. Just insert into corner post and push all the way up until it hits bottom of subsiding.

For 3 1/2" corner posts, snip off the **YELLOW** legs and **YELLOW** base sections.

For 3" corner posts, snip off the **GREEN** legs and **GREEN** base sections.

For 2 3/4" corner posts snip off the **YELLOW** and **GREEN** sections and then snip off the **RED** base sections and inner tab **ONLY**

Kit Includes: 10 KritterCap® PROs
1 inspection mirror
1 flashlight
1 set of snips

Inserting KritterCap® PRO

The KritterCap® PRO is made to fit tight into the outside vinyl corners of the home. Once the cap legs and base have been cut to proper size begin to push cap up into corner. Start one side at a time "flexing" the vinyl corner until both posts are in place. Push corner insert **ALL THE WAY UP** until the base tabs stop at subsiding. Most fit very snug. * If cap is loose put a couple dabs of adhesive sealer on posts of insert before pushing back up into place. Use provided inspection mirror and flashlight to inspect for good fit.

CAUTION: CHOKING HAZARD! ALWAYS PROPERLY DISCARD all pieces and sections removed for installation. Do not leave trimmed pieces laying on the ground where they are accessible to small children and pets.
